

MIA-221

APPLICATIONS

- Nightclubs
- VIP Rooms
- Bar & Lounges
- Live Music Venues

SPECIFICATIONS

Performance

Frequency Range (+/-3dB) 27 Hz – 120 Hz

Coverage Omnidirectional

Nominal Impedance 2 x 4 ohms

Power Handling RMS 2 x 3600W

Sensitivity 1W @ 1m 99 dB SPL

Maximum Peak SPL at 1m 142 dB

Recommended Amplifier EP-50002

Recommended Processor BSS & Q-Sys

Connectors

Driver 1: 1 x Neutrik NL4

Driver 2: 1 x Neutrik NL4

Enclosure

Enclosure Construction Premium Birch Plywood

Color Black, White or RAL

Finish ISO-flex Paint

Dimensions (H x W x D) (23.86" x 55.35" x 35.43")

Net Weight 240 lbs. (109 kg)

DESCRIPTION

MIA221 employs two immensely powerful 21" drivers, each delivering 7.2 kW peak, to create a massive low-end foundation for large scale sound systems. The hybrid design ensures that this true sub bass extension will be felt as well as heard. The use of extremely stiff yet lightweight membranes allow the subwoofer to deliver frequencies of up to 120 Hz with no sacrifice in fidelity.

KEY FEATURES

- Horn loaded - hybrid, vented subwoofer
- Omnidirectional
